

Letter of Recommendation for Orynbayev Amantay

1/1 Abylai Khan Street, Kaskelen, Kazakhstan | birzhan.moldagaliyev@sdu.edu.kz

To Whom It May Concern:

This letter is my personal recommendation for Amantay. I have been Amantay's instructor on "Introduction to Algorithms" course in the first semester of 2018-2019 academic year. Amantay has shown an exemplary perseverance in solving challenging algorithmic problems and a commitment in carrying his duties as a member of problem set solutions team.

I have been both lecturer and practice session instructor for Amantay. Though lecture participation was optional, Amantay has attended every lecture. Furthermore, he was always attentive during the lectures, and used to clarify every point which might have been unclear. Amantay was ready to go an extra mile in order to achieve his goal, which was understanding the algorithms in the case of our lectures.

When it comes to practice sessions, Amantay was diligent in preparing his homeworks up to utmost details. Often Amantay provided perfect solutions to the given homework problems. In the few cases when his solutions were not fully correct, he demonstrated a sincere humility of finding out a correct solution and learning new ideas behind it. Apart from tackling and understanding problems, he was willing to share his knowledge with classmates and help them to become better problem solvers.

One quality which distinguishes Amantay from his peers is the value that he has contributed to our class as an editor of problem set solutions notes. Each week Amantay and his teammates set up to provide the solutions for weekly problem sets. Amantay was responsible for editing and organizing these notes. I have witnessed Amantay's growth as an editor by observing a gradual improvement in quality of the solution notes. The first few notes

were stylistically quite plain, however formatting and style of the last solution notes were excellent.

Summarizing my points, I highly recommend Amantay. He is a capable and hardworking learner and a great team player. I am sure that he will contribute a great deal to any community that he will be part of. Please feel free to contact me about his character or his academic work in my course.

Sincerely,

Moldagaliyev Birzhan, Lecturer at Suleyman Demirel University (SDU).

February, 2019.
